**Model MC 12
TWIN LOOP
MANUAL CLOSER**

Instruction Manual & Parts List

OPERATING INSTRUCTIONS TWIN LOOP MANUAL CLOSER

INSTRUCTIONS:

- Measure book thickness and determine element size from chart.
- Measure binding edge and determine number of loops per inch. Measure edge in inches, then multiply by number of loops per inch and subtract 1.

Example: 11" binding edge at 3 loops per inch = 33 - 1
(32 loops for an 11" binding edge)

- Stack book with front cover up. Rotate back cover to top. This ensures that wire loop closure will be inside of book.

START ELEMENT

INSERT ELEMENT

- Turn book over (cover down). Insert wire elements into book.

Insert product into the Manual Closer between the ram and the stationary block. Pull the handle down until the element is closed properly. (Refer to notes below for proper element closing). If the element is not closed properly, adjust the ram accordingly with the adjusting knobs.
